WASCHBECKEN-BASINS

Ideen aus der Keramik-Werkstatt

Klasse statt Masse & Individualität statt Standards

Unser Keramikhersteller wurde 2010 gegründet und hat seitdem eine Entwicklung vorzuweisen, die uns immer wieder so überzeugt hat, dass wir Ihnen diesen besonderen OEM-Partner der A.H.S. nicht länger vorenthalten dürfen.

Entschlossen, sich auf die Entwicklung und das Design schöner Keramik zu fokussieren, hat man bewusst die Großstadt hinter sich gelassen. Stattdessen sucht man in der ruhigen Natur immer wieder neue Kraft und Inspiration für kreative Schöpfungen.

Kreativität und technische Entwicklung setzen dieser Manufaktur ihre Stempel auf. Auch wenn dieser Katalog bereits eine große Auswahl bietet, darf er durchaus als Inspiration für Ihre eigenen Ideen und Entwürfe verstanden werden. A.H.S. bietet Ihnen den erforderlichen Service für Kommunikation und Abwicklung, die Manufaktur das technische Know-How für die Umsetzung Ihrer Ideen.

Alle Produkte unterliegen einem unabhängigen, wissenschaftlich aufgebauten Qualitätsmanagement.
Seit der Einführung des „Intelligent Execution Management System“ (MES) ist es möglich, jedem einzelnen Produkt eine ID zuzuordnen, die durch das Scannen von Barcodes den Werdegang jedes Einzelstücks durch den gesamten Produktionsprozess begleitet und dokumentiert.

Ideas from the ceramic manufacture

Class instead of mass & individuality instead of standard

Our ceramic manufacturer was founded in 2010 and since then has developed in such a convincing way that we can no longer withhold this special OEM partner of A.H.S. from you.

Determined to focus on the development and design of beautiful ceramics, they have consciously left the big city behind. Instead, they continue to seek new strength and inspiration for creative creations in the tranquil natural surroundings.

Creativity and technical development have left their mark on this manufactory. Even though this catalogue already offers a large selection, it may well be understood as inspiration for your own ideas and designs. A.H.S. offers you the necessary service for communication and processing, the manufactory the technical know-how for the realisation of your ideas.

All products are subject to independent, scientifically based quality management. Since the introduction of the „Intelligent Execution Management System“ (MES), it has been possible to assign an ID to each individual product, which, by scanning barcodes, accompanies and documents the progression of each individual item through the entire production process.

SIMPLE BUT NOT SIMPLE

Enjoy minimalist living

Antibakterielle und Keramik schützende Beschichtung

Alle Keramikwaschbecken in diesem Katalog können optional mit der NAMI-Technologie behandelt werden. Sie erzielt einen extremen Abperleffekt von wässrigen und öligen Flüssigkeiten. Abperlende Tropfen nehmen Schmutzpartikel von der Oberfläche mit. Die einzigartige Architektur der Oberfläche minimiert die Haftung von Schmutz, Kalk und Bakterien. Der natürliche mechanische Abrieb wird minimiert und die Strahlkraft der Keramik maximiert.

Die NAMI-Technologie macht aus dieser Keramik ein langlebiges und pflegeleichtes Produkt!

Antibacterial and ceramic protective coating.

All ceramic washbasins in this catalogue can be optionally treated with NAMI technology. It achieves an extreme beading effect from aqueous and oily liquids. Beading drops take dirt particles with them from the surface. The unique architecture of the surface minimises the adhesion of dirt, limescale and bacteria. The natural mechanical abrasion is minimised and the radiance of the ceramic is maximised.

NAMI technology makes this ceramic a long-lasting and easy-care product!
